• The new law makes it a crime to publish false or misleading information, spread panic, or instigate hatred, violence, or disorder in the wake of a natural disaster.

• The law criminalizes the use of social media and other platforms to spread false information or incite violence.

• The law provides for the imprisonment of those who violate the new regulations for up to three years.

• The government has implemented a new system to monitor social media and other platforms for violations of the new regulations.

• The government has also established a hotline for reporting violations of the new regulations.

• The government has also established a committee to review and enforce the implementation of the new regulations.

• The government has also established a mechanism to provide compensation to victims of online violence.

• The government has also established a mechanism to provide legal aid to victims of online violence.

• The government has also established a mechanism to provide psychological assistance to victims of online violence.

• The government has also established a mechanism to provide support to families of victims of online violence.

• The government has also established a mechanism to provide support to victims of online violence.

• The government has also established a mechanism to provide support to victims of online violence.
1. In the past year, the Disrupting Harm – Ethiopia program has been working with children aged 12 to 17 years old and their families in Ethiopia. The program aims to prevent child abuse and exploitation in online environments. The program is supported by international organizations such as ECPAT, INTERPOL, and UNICEF. The program has also been working with international organizations to raise awareness about online child protection. As of 2014, the program has led to the creation of an online initiative called "Safe Online initiative" to prevent child abuse and exploitation online.
